

Summary

I am working as an Oracle PL/SQL developer since 2004.

I have developed and maintained various systems in various sectors. Government, insurance, retail etc.

I develop software at high speed and quality with Oracle Forms/Reports and directly on database with PL/SQL.

Beside my Oracle profession i am an evangelist of open source. I use Linux for my personal development environment. My favourite languages are python, erlang, javascript, smalltalk, java, common lisp, php etc.

I love web programming and comfortable with client-server systems, HTTP protocol, REST, client side (javascript) etc.

Experience

Unit Manager, ERP Application Development A&Y Marka Mağazacılık A.Ş.

Jun 2010 – Present

A big textile retail company includes the famous brands Network, Fabrika, Beymen Bussiness, Altınyıldız Classics, Arzu Kaprol, Que, T-box, Divarese. I am responsible of the maintenance and development processes of the ERP part of in house developed system.

Main database is Oracle 10g RDBMS and Oracle Forms 6i/10g, Reports 6i/10g tools for user interface.

I made use of Oracle object system in my projects. I implemented some applications with object oriented facilities provided directly in database.

Project Manager, Software

Beymen Boğaziçi Alboy Mağazacılık A.Ş.

May 2007 – Jun 2010

Big textile retail company includes the brands T-box and Divarese. I was responsible all of the software projects. Maintenance of the in house developed ERP system mostly coded on Oracle database and Forms/Reports tools was my primary responsibility. My team consist of one or two developer except me.

I manage the whole implementation/migration of a new ERP system called Nebim Winner. The planning, data migrating, testing and implementation was successfully done in six months.

Software Development Specialist, Oracle PL/SQL

Akademi Yazılım A.Ş.

Sep 2006 – May 2007

Company were offering all in one solutions to big insurance companies. Oracle RDBMS, Oracle Forms/Reports tools were our main development stack. I coded directly on database with PL/SQL language. I improved my SQL experience and skills on direct database programmable objects like stored procedures, functions, packages and triggers.

Nginx

Software Support Specialist, Oracle Forms/Reports
Sampaş Yazılım A.Ş.

Jun 2004 – Sep 2006

The company was developing software systems for all operations of municipalities. I was in a team supports customers directly. My responsibilities were; first analyze of the project, installation, data migration, training and continuous support including data mining operations, on the fly solutions includes code modifications etc.

I experienced with Oracle developer tools very first time here. I mainly code in Oracle Forms 6i and Oracle Reports 6i tools with PL/SQL, a Pascal like procedural programming language. Also, i gained high level of SQL experience here.
