SUMMARY

I am working as an Oracle PL/SQL developer since 2004.

I have developed and maintained various systems in various sectors. Government, insurance, retail etc.

I develop software at high speed and quality with Oracle Forms/Reports and directly on database with PL/SQL.

Beside my Oracle profession i am an evangelist of open source. I use Linux for my personal development environment. My favourite languages are python, erlang, javascript, smalltalk, java, common lisp, php etc.

I love web programming and comfortable with client-server systems, HTTP protocol, client side (javascript) etc.

SKILLS

- Oracle
- SQL
- Java
- Glassfish
- Web Applications
- Ruby on Rails
- PHP
- Erlang
- Common Lisp
- Windows
- Nginx
- REST
- Git
- OOP
- Software Development
- Open Source
- JAXWS

- PL/SQL
- Python
- Web Services
- Django
- Ruby
- JavaScript
- Play Framework
- Haskell
- Linux
- Apache
- HTTP
- Web Development
- Subversion
- MySQL
- Databases
- JAXB
- NetBeans

EXPERIENCE

Ay Marka Mag. AS   06 / 2010 - Present
Software Development Unit Manager

A big textile retail company includes the famous brands Network, Fabrika, Beymen Bussiness, Altınyıldız Classics, Arzu Kaprol, Que, T-box, Divarese. I am responsible of the maintenance and development processes of the ERP part of in house developed system.

Main database is Oracle 10g RDBMS and Oracle Forms 6i/10g, Reports 6i/10g tools for user interface.

I made use of Oracle object system in my projects. I implemented some applications with object oriented facilities provided directly in database.

Beymen Boğaziçi Alboy A.Ş.   05 / 2007 - 06 / 2010
Software Projects Manager

Big textile retail company includes the brands T-box and Divarese. I was responsible all of the software projects. Maintenance of the in house developed ERP system mostly coded on Oracle database and Forms/Reports tools was my primary responsibility. My

team consist of one or two developer except me.

I manage the whole implementation/migration of a new ERP system called Nebim Winner. The planning, data migrating, testing and implementation was successfully done in six months.

Akademi Yazılım   09 / 2006 - 05 / 2007
Software Development Specialist

Company were offering all in one solutions to big insurance companies. Oracle RDBMS, Oracle Forms/Reports tools were our main development stack. I coded directly on database with PL/SQL language. I improved my SQL experience and skills on direct database programmable objects like stored procedures, functions, packages and triggers.

Sampaş Yazılım A.Ş.   06 / 2004 - 09 / 2006
Software Support Specialist

The company was developing software systems for all operations of municipalities. I was in a team supports customers directly. My responsibilities were; first analyze of the project, installation, data migration, training and continuous support including data mining operations, on the fly solutions includes code modifications etc.

I experienced with Oracle developer tools very first time here. I mainly code in Oracle Forms 6i and Oracle Reports 6i tools with PL/SQL, a Pascal like procedural programming language. Also, i gained high level of SQL experience here.

EDUCATION

Anadolu Üniversitesi   2007 - 2011
Bachelor of Science (BS) , Bussiness Management

Celal Bayar Üniversitesi   2001 - 2003
Computer Programmer

INTERESTS

egzotic programming languages like python, haskell, lisp, erlang etc.

LANGUAGES

● English (Professional working proficiency)   ● Turkish (Native or bilingual proficiency)
